MILITARY-GRADE  
PRESSURE WASHER**

**BASIN ENGINEERED FOR BASIN INDUSTRY**

**FEATURES & BENEFITS**

- DIESEL DRIVEN**
- DIESEL FIRED BURNER**
- 1-2 GUNS**
- 700,000 BTUs OF HEAT**
- 10 GPM @ 3,000 PSI**

**TRULY DEPENDABLE EQUIPMENT**

The Honey Badger is roughneck proof and designed to clean under the toughest industrial oilfield conditions. From its rugged air cooled diesel engine and stainless steel 100 micron water filter, to the NEMA 4X enclosure with MIL-SPEC connectors, the Honey Badger is engineered to hold up to the worst the Basin has to offer. We refuse to compromise on durability, reliability, or mobility.

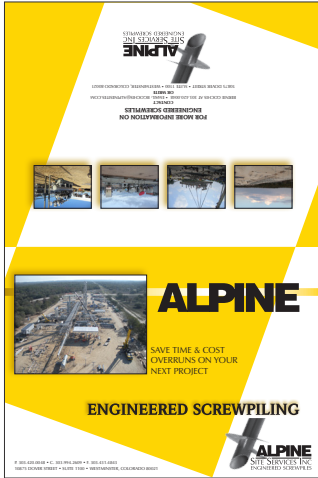

The all diesel Honey Badger is at home on lease roads and can get where you need to go. It brings along 500 gallons of fresh water, and is only a T hammer union away from being directly into your on site fresh water supply. Using anything else in an industrial setting is asking for headaches. We know because Agile made its debut cleaning frac trucks. Constant equipment failure drove us to build our own equipment, and now we want to share that equipment with you.
